

Adhesive chip, designed for metal products, for the individual identification, control management and PPE allocation. Digital traceability is made possible by the HF RFID technology, which allows for immediate reading with any smartphone that is equipped with NFC functionality and professional use with the C.A.M.P. NFC TRACK universal reader (ref.3251).

Compatible with the C.A.M.P. G.T.S. - Gear Tracking System software/app and with other systems that support NFC technology. In case of intensive use or application on exposed surfaces, we recommend protecting the chip with an adhesive (ref.3249) or thermoshrinkable (ref.3250) layer to protect the chip.

Instructions for application and use are easily accessible by scanning the chip with a smartphone.

Pack of 50 pcs.
