FALCON MOUNTAIN

FALCON MOUNTAIN is an ultra-lightweight sit harness designed for rescue operations that involve climbing techniques. Its ventral attachment point has a textile bridge for mobility when progressing and comfort when walking. The design is very lightweight and comfortable, joining the slim, semi-rigid waistbelt and leg loops with 3D foam padding, which provides an optimal balance between low weight and comfort, as well as reduced bulk. The DOUBLEBACK self-locking buckles on the waistbelt and leg loops make it quick and easy to put on and adjust. The rear plastic buckle allows a TOP or TOP CROLL L chest harness to be attached.

Ventral attachment point with textile bridge favors progression with climbing techniques and makes for comfortable walking.

The semi-rigid, slim waistbelt and leg loops with 3D foam padding provide an optimal weight-to-comfort ratio. The slim width of the waistbelt at the hip provides greater comfort.

Waistbelt and leg loops equipped with small self-locking DOUBLEBACK buckles for quick and easy adjustment.

Installing the RING2RING accessory on the ventral attachment point allows better equipment organization (lanyard(s), descender, rope clamp, chest harness, or other equipment).

Short Description Ultra-lightweight and comfortable sit harness for rescue operations that involve climbing techniques

- Selling Points**
- Especially suited for rescue operations that involve climbing techniques:
 - Ventral attachment point with textile bridge favors progression with climbing techniques and makes for comfortable walking
 - Ultra-lightweight and comfortable:
 - Semi-rigid, slim waistbelt and leg loops with 3D foam padding, providing optimal comfort-to-weight ratio and reduced bulk
 - Waistbelt is slimmer at the hip for greater comfort and ease during approaches or when working on the ground
 - Textile side attachment points, for occasional use, limit bulk and weight
 - Ergonomic:
 - Waistbelt and leg loops equipped with small self-locking DOUBLEBACK buckles for quick and easy adjustment
 - Possible to install the RING2RING accessory on the ventral attachment point for better equipment organization (lanyard(s), descender, rope clamp, chest harness, or other equipment)
 - Rear plastic buckle allows a TOP or TOP CROLL L chest harness to be attached
 - Four equipment loops: two large rigid ones in front for easy access to gear, and two small flexible ones in back that will not interfere with wearing a backpack
 - Two slots for CARITool tool holder

-
- Specification**
- Material(s): Nylon, polyester, aluminum
 - Ventral attachment point: Yes
 - Lateral attachment points: Yes
 - Rear attachment point on the waistbelt: Yes
 - Certification(s): CE EN 813, CE EN 358, CE EN 12277 type C, UKCA, EAC, ASTM F1772
