SEQUOIA® PLUS

If you're an expert arborist looking for a harness that strikes the perfect balance between comfort, support, convenience, and offers a wide range of accessories — the SEQUOIA PLUS is for you. With ultra-comfortable 3D foam padding, the SEQUOIA PLUS also features extra wide and rigid waistbelt and leg loops for optimal support. FAST opening buckles make it quick and easy to don. With adjustable DOUBLEBACK buckles and anti-slip device, the setback is easy to adjust and stays in place. The wide, gated front attachment points allow the user to install an additional attachment bridge. They also allow a ZILLON or MICROFLIP work positioning lanyard to be connected. The integrated SRS ascent system allows you to simply connect the KNEE GRAB knee ascender for more efficient rope ascent. The waistbelt allows you to organize and carry all the necessary equipment for working in the canopy.

The extra wide and rigid waistbelt and leg loop design provides excellent support. These zones are also sculpted and lined with 3D foam padding for comfort while suspended.

The waistbelt and leg loops are equipped with FAST opening buckles that fasten and unfasten quickly and easily, even while wearing gloves, without loss of adjustment.

The gated attachment points allow two attachment bridges to be installed and offer different connection options.

To increase efficiency when ascending using SRS techniques, the SEQUOIA PLUS is equipped with an integrated system on the waistbelt that allows the user to connect a KNEE GRAB knee ascender.

Short Description	Comfortable sit harness for tree care offering excellent support and an integrated SRS ascent system
