## SEQUOIA® Shoulder Straps

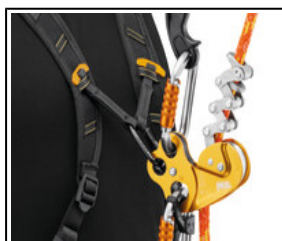

The SEQUOIA shoulder straps are used with the SEQUOIA or SEQUOIA PLUS harness. With padded straps, they allow weight to be displaced from the waistbelt and distributed comfortably across the shoulders. The modular design allows the shoulder straps to transition to Torso mode to connect an SRS ascent system. In order to better adapt to different body sizes, the height of the sternal connection can be adjusted.

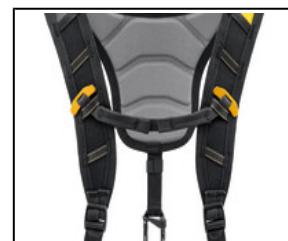

With comfortable padding, the shoulder straps redistribute the load of the waistbelt across the shoulders.

Transition the shoulder straps to Torso mode by removing the rear strap and connecting the front straps to loops in the back.

Connect an ascent system on the sternal strap with an accessory carabiner like the MINO (not included).

Three possible connection heights for the ascent system provide a more customized adjustment.

---

## Short Description

Comfortable shoulder straps for SEQUOIA and SEQUOIA PLUS harnesses with connection points for an SRS ascent system

---

## Selling Points

- Shoulder straps quickly connect to harness:
  - Three webbing straps connect with MINO accessory carabiners (included)
  - Shoulder straps are compatible with a variety of tree care sit harnesses
- Comfortable:
  - With a padded interior, the shoulder straps allow weight to be displaced from the waistbelt and distributed comfortably across the shoulders
  - Straps are widely spaced to reduce neck chafing
  - Straps are equipped with adjustable buckles to adapt to different heights
  - Sternal strap is removable to make it easier to put on and take off the shoulder straps
- Can be used with an SRS ascent system in Torso mode:
  - Shoulder straps can be connected to the ascent system to keep it raised when using SRS techniques
  - Connect an ascent system to the sternal strap with an accessory carabiner like the MINO (not included)
  - Three possible connection heights provide optimal adjustment

This product is not PPE (Personal Protective Equipment).
