

Ref. 3486

TREE CLIMBING, ROPE ACCESS, TEAM RESCUE

A unique double lanyard for tree climbing. The Gyro Lanyard Double combines two length adjustment systems into a single connection point with the innovative Gyro X3 swivel device.

The Gyro uniquely allows the user to rotate and tilt freely on the single attachment point even while using both lanyard legs.

The retrieving pulley features a minimal design and is equipped with a built-in secondary attachment point. Soft 8 mm polyesteraramid cord integrates with the rope for smooth, precise, and secure length adjustment. Pre-assembled with a Michoacan hitch, also certified with the Catalyst and Distel for the best possibility of customization.

The Iridium 11 mm Heatcore polyamide rope with exclusive CRT (Compact Rope Termination) loops delivers long-lasting ease of handling, durability and robustness thanks to the Heatcore technology that joins the sheath and core.

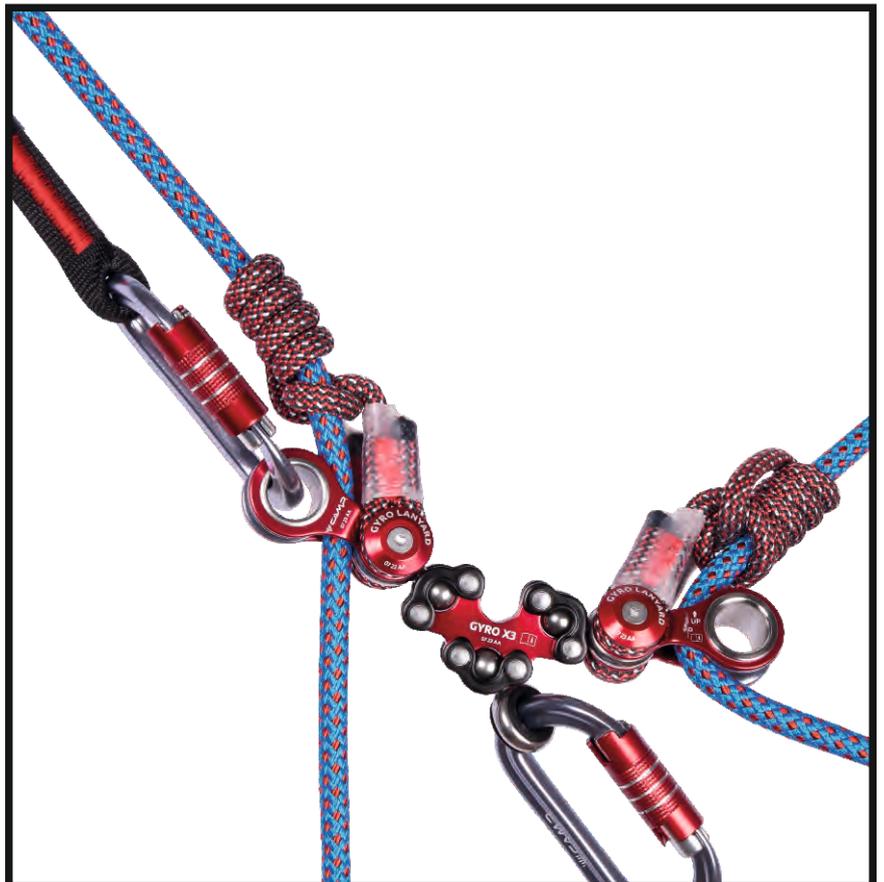

High visibility colors.

The adjustment system can be disassembled by the user (Torx T20 allen wrench included) to replace the rope and the cord.
