

Designed for the most demanding of users, the new FLEXA range of harnesses combines safety, comfort and productivity. Elastic shoulder straps as well as articulation rings provide the user with greater freedom of movement.

The FLEXA range is available with 3 types of closure for precise and practical adjustment of the harness:

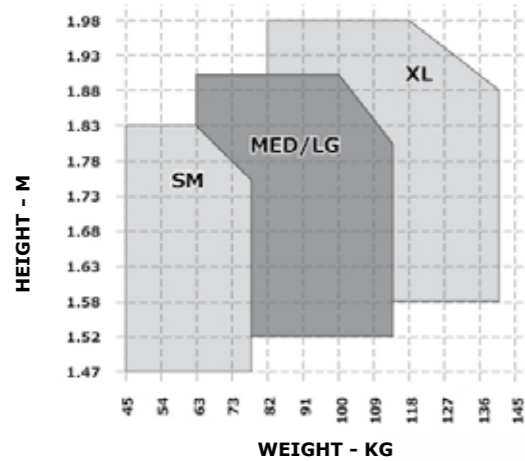

A rotation belt with positioning D rings specifically adapted to working under restraint is also available on some models.

Multiple adjustments allow the weight of the harness to be perfectly distributed over the whole body, improving user comfort and reducing fatigue.

Specifications :

Choice matrix:

Weight limit : 140 kg

Permissible usage temperatures : from -35°C to +57°C

Materials :

- Buckles : White zinc-plated steel
- Red and grey straps : Polyester (Resistance : 26kN)
- Elastic strap : Polyamide and rubber (Resistance : 22kN)
- Thread : Polyester (>0.6N/Tex)
- Padding : EVA foam covered with Polyamide + Urethane
- Dorsal Plate : Polyethylene

Standards :

Conforms to EN361:2002 and EN358:2002 standards

**More flexibility
for greater
comfort**

Features and Benefits of the FLEXA harness with Belt

For your comfort ●

For your safety ▲

- **Elastic Shoulders**
Greater freedom of movement and improved comfort
- **Accessory Attachment Point**
Avoids carrying lanyard by hand when no longer in use
- **Articulation Rings**
Allows upper and lower body to twist providing greater freedom of movement
- **Positioning Strap**
Allows adjustment of belt height and rotation
- **Thigh Straps**
Padded straps which go around the whole leg for increased ergonomics.
Both legs are linked together by a sub pelvic strap which offers added safety in the event of a fall
- **Back Plate**
Large size allows straps to be held in position
- ▲ **Attachment Point**
Front and rear forged D rings providing easy to use and safe connection
- ▲ **Fall Indicator**
Allows visual inspection in the event of a fall
- ▲ **Identification**
Improved traceability thanks to a label protection cover
- **180° Belt**
● Enables rotation through nearly 180° increasing flexibility. Wide opening lateral D rings improving ease-of-use. Specially designed padding for greater comfort and added safety for working under restraint
- **Tool Holder**
Ideal for holding tools and accessories required whilst working at height
