- (13) **13.1 Subject and Type**
Rescue System
Type: Sked Rescue System

13.2 Description

The rescue system, type: Sked Rescue System (Fig. 1-2), is used to transport an immobile person in a vertical or horizontal arrangement.

The rescue system is a rollable plastic shield, the Sked Stretcher, with dimensions of approximately 2.44 m x 0.90 m, with two handles on each long side. There are also four straps with adjusters on the sides, which can be used to shape the stretcher and to hold the person in place. Further straps and a handle for pulling the stretcher are attached to the head and foot ends.

Furthermore, the rescue system includes two rescue loops, type: Horizontal Lift Sling and one lanyard, type: Vertical Lift Sling.
